Energy with Integrity: Building a Net Zero Future

MRPL's Sustainability Report for FY 2024–25 is anchored in the theme “Energy with Integrity: Building a Net Zero Future”. It signifies MRPL's commitment to transition from vision-setting to operational delivery, embedding ESG principles deeper into our decision-making, governance and day-to-day practices.

“**Energy with Integrity**” articulates the spirit in which MRPL is pursuing its Net Zero by 2038 ambition. It emphasizes that we are not only accelerating the pace of our environmental transition but doing so with accountability, transparency and a long-term commitment to ethical business conduct. This integrity-first approach shapes how we design initiatives, engage stakeholders, disclose progress and respond to evolving expectations.

The theme also acknowledges the growing complexity of the energy transition. MRPL recognizes that decarbonization is not a linear journey, it requires systemic transformation across refining operations, supply chain and workforce culture. During FY 2024–25, MRPL took deliberate steps to integrate sustainability across three interconnected pillars:

From enhancing energy efficiency and emissions management to scaling renewable integration, water conservation and circular waste solutions, MRPL focuses on minimizing its ecological impact while promoting responsible resource use.

We are expanding community development programs, advancing workforce well-being and supporting a diverse, inclusive and safe workplace.

Stronger ESG governance mechanisms, enhanced disclosures and policy-led compliance frameworks continue to underpin our sustainability strategy.

This year's sustainability report reflects our improvements in energy efficiency, waste management, workforce management and local sourcing. As we move ahead, MRPL remains focused on not only “what” we achieve on the path to Net Zero, but also “how” we achieve it with integrity at the core of every action.

With this theme, MRPL reaffirms its belief that integrity is not an add-on to sustainability, it is its foundation.

About the Report

Mangalore Refinery and Petrochemicals Limited (MRPL) presents its annual Sustainability Report for the financial year April 1, 2024 to March 31, 2025. This report reaffirms our commitment to transparency, accountability and stakeholder-centric disclosures while reflecting the theme for the year – **“Energy with Integrity: Building a Net Zero Future.”**

Reporting Scope and Boundary

The Sustainability Report covers the non-financial performance and ESG initiatives of MRPL across its core operations, including:

- The refinery and petrochemical complex located in Mangalore, Karnataka
- Our corporate offices in Mumbai, Delhi and Bengaluru
- Marketing Terminal (Devangonhi)

Joint ventures (JVs), subsidiaries, or associate entities are not included in the scope of this report.

Report Content

The report communicates MRPL's sustainability strategy, material topics, risks and opportunities, operational progress and stakeholder engagement outcomes, along with alignment with our Net Zero 2038 ambition. It is designed to meet the information needs of investors, shareholders, customers, employees, suppliers, communities, regulatory bodies and other stakeholders.

Reporting Principles

This report has been prepared in reference to the Global Reporting Initiative (GRI) Standards 2021, including GRI 11: Oil and Gas Sector Standards. It also aligns with the United Nations Global Compact (UNGC) principles, Sustainability Accounting Standards Board (SASB) and is consistent with India's Business Responsibility and Sustainability Reporting (BRSR) framework and National Guidelines for Responsible Business Conduct (NGRBC). These globally accepted frameworks guide our approach to identifying material ESG topics, data collection and performance disclosure.

Forward-looking Statement

This report includes forward-looking statements that reflect MRPL's current views on future plans, expectations, intentions and strategies. These include but are not limited to projections around energy transition, climate action, ESG integration and Net Zero ambitions.

Terms such as “expects,” “anticipates,” “intends,” “aims,” “targets,” “plans,” and similar expressions denote forward-looking content. While these statements are based on reasonable assumptions, actual results may differ due to external and internal factors beyond MRPL's control. Readers are advised not to place undue reliance on such statements. MRPL disclaims any obligation to update these statements publicly.

Contact Details and Feedback

We value feedback from our stakeholders to improve the quality and relevance of our disclosures. Please write to us at sustainabilityreporting@mrpl.co.in

Disclaimer

The data and insights presented in this report have been internally validated by MRPL. While every effort has been made to ensure accuracy and completeness, some data may be subject to estimation, especially where third-party information is referenced. This report is intended solely for general information and should not be construed as investment advice or legal guidance.

Message from the Managing Director & CEO

Dear Stakeholders,

It is with great pride that I present MRPL's Sustainability Report for FY 2024–25. This edition marks a significant milestone in our journey - from envisioning a sustainable future to demonstrating tangible progress. Our theme for the year, "Energy with Integrity: Building a Net Zero Future," reflects our core belief that sustainability is not only defined by what we achieve, but equally by how we achieve it.

Over the past year, MRPL has deepened the integration of ESG principles into its business strategy.

On the environmental front, we advanced energy efficiency measures, expanded renewable energy integration by 280.40% from last year and strengthened our emission management practices. These efforts have resulted in reducing the emission intensity per tonne of crude oil consumed by 5.95% compared to last year.

Further, operational improvements continue to reduce fuel consumption and enhance productivity. In line with our Net Zero roadmap, we are

progressing with transformative projects such as the Bio-ATF demonstration plant targeted for 2027, our green hydrogen pilot and the plastic waste depolymerization unit scheduled for commissioning in 2025. Complementing these efforts, we have expanded the green cover around our refinery and invested in water stewardship initiatives. We follow an integrated water management approach rooted in the principle of reduce, reuse and recycle. In FY 2023-24, MRPL achieved notable improvement in water footprint through operational efficiency and reuse of treated wastewater. These efforts led to a 7.7% year-on-year reduction in overall water consumption and a 15.2% decrease in water intensity (measured in KL per metric tonne of crude processed). Further, the commissioning of desalination and sewage treatment facilities has contributed to reducing freshwater consumption, reinforcing our commitment to environmental sustainability. MRPL adopts a proactive, circularity-driven approach to waste management, focused on enhancing resource efficiency and minimizing environmental impact.

Our workforce is the cornerstone of MRPL's success. We are committed to fostering a workplace where employees feel valued, empowered, and inspired to perform at their best.

Our ARISE initiative exemplifies this commitment—serving as both a cultural foundation and a strategic roadmap for employee engagement and organizational growth. It integrates key pillars of excellence, adaptability, innovation, safety, and sustainability. Additionally, a comprehensive suite of employee benefits, along with robust training and development programs, underscores our dedication to employee well-being and continuous growth. Diversity and inclusion also remain core priorities, with women now comprising 8.93% of our total workforce, supported by dedicated initiatives to nurture leadership, inclusion and equity across the organization. MRPL is committed to maintaining a safe and healthy workplace for all personnel. We have implemented an ISO 45001:2018 certified Occupational Health and Safety (OHS) Management System, designed to safeguard the well-being of the workforce.

In FY 2024–25, we spent over INR 29.09 crore in community development programmes spanning education, healthcare, clean drinking water and livelihood enhancement, positively impacting more than 0.38 million lives.

Ethical governance underpins all our actions. Guided by the Board and its dedicated committees, MRPL ensures robust oversight of corporate governance, risk management and stakeholder engagement. Our governance framework is aligned with SEBI, DPE and MoPNG directives while also reflecting global best practices. We uphold a strict zero-tolerance approach to corruption, bribery and discrimination, reinforced by a comprehensive Code of Conduct and Whistleblower Policy. Transparency and accountability are embedded in every disclosure we make, and integrity continues to define the way we do business.

The road to Net Zero is complex, demanding systemic transformation across refining operations, supply chains and workforce culture. At MRPL, we recognize that this journey requires bold, integrated action. As we move forward, our efforts will focus on scaling initiatives that reinforce three interconnected pillars. The first is environmental stewardship, where we will advance renewable energy integration, improve energy efficiency and embed climate resilience into every layer of our operations. Equally important is our commitment to social responsibility, as we deepen partnerships with

local communities, enhance employee well-being and foster a diverse and inclusive workplace that reflects our values. Finally, our governance framework will remain anchored in ethical leadership, ensuring accountability, strengthening disclosures and setting benchmarks for corporate responsibility. Together, these pillars will guide MRPL in driving innovation, collaboration and investment in solutions that deliver long-term sustainability and business resilience. By 2038, our ambition is not only to achieve Net Zero but also to be recognized as a trusted, transparent and transformative energy company that creates lasting value for India and the world.

I extend my heartfelt gratitude to our employees, partners, investors, regulators and communities for their unwavering trust and support in this transformative journey. With your continued collaboration, we are confident in our ability to lead with purpose, innovate with responsibility and create a sustainable legacy for generations to come.

Warm regards,

Shri Mundkur Shyamprasad Kamath
Managing Director & Chief Executive Officer

ESG & Business Highlights (FY 2024–25)

Energy intensity: **68.60 GJ/INR million** of revenue and **4.15 GJ/MT** of crude processed

Power consumed from solar/renewables: **2,04,225 GJ**

Energy savings achieved – 1.62 million GJ through energy conservation and efficiency initiatives

GHG emission

Scope 1: **5.68 million tCO₂e**

Scope 2: **0.14 million tCO₂e**

Scope 1 and 2 emission intensity: **5.32 tCO₂e/INR million** of revenue and **0.32 tCO₂e/MT** of crude processed

Waste diverted from disposal: **~78%**

Water Intensity: **1.23 kL/MT** of crude processed

Total Workforce: **2,530**

Total CSR spend: **INR 29.09 Crore** and No. of beneficiaries: Over **0.38 million**

Gender diversity amongst employees: **8.93%**

Total training hours: **~69,564 hours**

Lost Time Injury Frequency Rate (LTIFR) – 0 per million hours worked for employees and **0.471 per million** hours worked for contractual workers

Zero incidents of Human Rights violations

Gender diversity on Board: **8.33%**

Zero cases of disciplinary action on bribery/corruption for Board of Directors

Procurement from within India: **21.78%**

Procurement from MSMEs or small producers: **54.82%¹**

Zero incidents of security/cyber breaches

¹ The percentage of inputs from MSMEs/small producers excludes: (a) crude, (b) single-tender, (c) proprietary, (d) plant/machinery orders ≥ ₹50 crore, and (e) ethanol purchases.

Awards, Accolades & Recognitions

MRPL's steadfast dedication to excellence across Environmental, Social and Governance (ESG) domains has been acknowledged through an impressive array of national and international accolades in FY 2024–25. These recognitions not only highlight the company's leadership in sustainable development but also its continued focus on innovation, operational efficiency and ethical governance.

Certifications

MRPL continues to uphold the highest standards of operational excellence, safety and sustainability through globally recognized certifications. These certifications demonstrate our commitment to continuous improvement, regulatory compliance and responsible business conduct across environmental, social and governance (ESG) dimensions.

Below is the list of ISO certifications received by MRPL:

- **ISO 9001:2015** – Quality Management System
- **ISO 14001:2015** – Environmental Management System
- **ISO 45001:2018** – Occupational Health & Safety Management System
- **ISO 50001:2018** – Energy Management System
- **ISO 27001:2013** – Information Security Management System
- **ISO/IEC 17025:2017** – Testing & Calibration Laboratories
- **AS9100:D** – Aerospace Quality Management System (MRPL is the first refinery in India to achieve this certification)

About MRPL: Company Overview

Mangalore Refinery and Petrochemicals Limited (MRPL) is a Schedule 'A', Category-1 Mini Ratna Central Public Sector Enterprise (CPSE), under the administrative control of the Ministry of Petroleum and Natural Gas, Government of India. A subsidiary of Oil and Natural Gas Corporation Limited (ONGC), MRPL is strategically positioned to leverage proximity to ports and key energy markets.

The company has consent to operate a state-of-the-art refinery with capacity of 18.2 MMTPA to process a diverse crude slate (API range 18° to 46° in the blend). MRPL's product slate spans high-quality fuels, petrochemicals and specialty products aligned with domestic and global market requirements. MRPL has retained the position of becoming the single largest PSU refinery at a single location based on the total crude processed during the year.

The refinery complex houses advanced secondary processing and treating units, including Hydrocracker, Catalytic Cracking and Coker units, producing Bharat Stage VI-compliant fuels and high-value distillates. MRPL also runs downstream petrochemical operations to enhance value addition through specialty polymers and aromatics.

The company's joint venture, Shell MRPL Aviation Fuels and Services Limited (SMA), supplies Aviation Turbine Fuel (ATF) across key airports in southern India, supporting both domestic and international carriers.

Products and Services Portfolio

MRPL's offerings include both fuel-based and non-fuel-based products:

Fuel-Based Products

- ❖ Liquefied Petroleum Gas (LPG)
- ❖ Motor Spirit (MS VI, MS 95 RON)
- ❖ Reformate
- ❖ Naptha
- ❖ Superior Kerosene Oil (SKO)
- ❖ Aviation Turbine Fuel (ATF)
- ❖ High-Speed Diesel (HSD)
- ❖ High Flash HSD (HFHSD)
- ❖ Marine Fuel Oil (MFO)
- ❖ Furnace Oil (FO)
- ❖ Petroleum Coke

Non-Fuel Products

- ❖ Polypropylene (PP)
- ❖ Paraxylene
- ❖ Benzene
- ❖ Xylol
- ❖ Mineral Turpentine Oil (MTO)
- ❖ Bitumen
- ❖ Sulphur
- ❖ Vacuum Gas Oil (VGO)
- ❖ Heavy Aromatics
- ❖ Toluene

These products cater to diverse sectors, including transportation, packaging, textiles, construction, pharmaceuticals and agriculture.

Our journey

MRPL continues to build on this legacy by prioritizing sustainability, digital transformation and ESG-aligned business growth.

Vision

To be a world-class **Refining and Petrochemicals Company**, with a strong emphasis on productivity, **customer satisfaction, safety, health and environmental management**, corporate social responsibility and **care for employees.**

Mission

Integrated Value Chain of MRPL

MRPL's operations span the downstream energy value chain from crude procurement to refining, petrochemicals production, marketing and sustainability-led innovation positioning the company as a critical contributor to India's energy security and low-carbon transition.

1. Feedstock Sourcing and Crude Procurement

MRPL does not operate directly in upstream Exploration & Production (E&P) but leverages strategic feedstock access through domestic and global suppliers.

2. Crude Transportation and Receipt

Crude is transported via maritime routes and received through MRPL's Single Point Mooring (SPM) and jetties at New Mangalore Port, enabling efficient unloading and seamless transfer to the refinery.

3. Refining Operations

MRPL has received the Consent to Operate for the refinery with a capacity of 18.2 MMTPA. As one of India's most advanced refineries, MRPL produces Bharat Stage-VI compliant fuels and a range of high-value petroleum products through an integrated primary and secondary processing units. The refinery caters the products to both domestic and international markets.

4. Petrochemical Manufacturing

MRPL's downstream units manufacture polypropylene, aromatics and other petrochemicals, enabling product diversification and supporting industrial applications across sectors.

5. Storage, Blending and Dispatch

Refined products and polymers are stored, blended and dispatched via an integrated infrastructure comprising storage tanks, blending systems, truck, rail terminals, ships and pipeline, ensuring operational efficiency and quality control.

6. Distribution and Logistics

MRPL uses a robust multimodal logistics network comprising of road, rail, pipeline, and sea transport to ensure timely and reliable delivery of products across diverse geographies. MRPL's strategically located depots further enable efficient last-mile delivery, serving regional markets.

7. Marketing and Retail Sales

MRPL reaches customers through:

- Direct institutional and bulk sales of fuels and petrochemical products.
- Aviation fuel sales via Shell MRPL Aviation Fuels & Services Ltd (SMA), supplying ATF at major airports across southern India.
- A growing network of retail outlets in Karnataka and Kerala, with expansion plans across southern India.

8. Alternate Energy and Innovation

Aligned with India's low-carbon future, MRPL is investing in:

- R&D for circular economy solutions, including plastic circularity and biofuels.
- Energy optimization through AI/ML applications in refining and utilities.
- Clean fuel development, including green hydrogen and waste valorization.

Operations and Market Presence

As of FY 2024-25, MRPL operates a single integrated refinery and petrochemical complex located in Mangaluru, Karnataka. The company also maintains a strong administrative and marketing presence across 12 offices in India, enabling efficient governance, stakeholder engagement and market outreach.

Number of Plants

01

Location

National

Number of Offices

12

MRPL has a significant presence across India and an expanding international footprint, reflecting its diverse product portfolio and customer base.

International Reach:

MRPL exported products to 28 countries during FY 2024–25, serving demand across Asia, Africa, Europe and the Americas. This global reach underscores MRPL's competitiveness and alignment with international quality and environmental standards.

National Reach:

MRPL distributes products across 18 states and 4 union territories, catering to industrial, commercial and retail segments through bulk sales, direct distribution and a growing retail outlet network.

In addition to our core refining business, we have expanded into retail, addressing transportation fuel needs in Karnataka and Kerala. We are also expanding our retail presence in the neighboring states of Andhra Pradesh, Tamil Nadu and Telangana.

Stakeholder Engagement

At MRPL, stakeholder engagement continues to be the bedrock of our sustainability strategy. As we pursue our ambition of achieving Net Zero by 2038, we recognize that long-term value creation is only possible through transparent, trust-based and continuous engagement with our stakeholders. Our FY 2024–25 theme, “Energy with Integrity: Building a Net Zero Future,” reflects our intent to foster inclusive growth while staying accountable to those who are directly or indirectly impacted by our operations.

We engage with a wide and diverse stakeholder base, including employees, customers, investors, regulators, suppliers and local communities. Through these engagements, we gather feedback, understand concerns, share updates and co-create strategies that align with MRPL’s values and stakeholder expectations. These dialogues are essential to ensuring that our ESG roadmap is both future-ready and grounded in stakeholder realities.

Our stakeholder engagement framework is informed by global sustainability reporting standards, including GRI, BRSR and UNGC principles. We follow a structured, two-way communication process that ensures timely, need-based and transparent exchange of information.

Stakeholder Engagement Process

Our engagement framework is based on regular and need-based interactions, conducted through both digital and physical channels. The feedback we receive continues to inform our ESG governance approach, operational decisions and reporting practices.

Stakeholder	Engagement Topics	Frequency	Value Delivered
Customers 	- Email - Website - Advertisements - Notifications - Meetings	On a requirement basis	- Purchase of Crude - Sale of Petroleum & Petrochemical products - Hiring of Ship - Communications related to contract, its execution and commercials - Sales improvement - Quality & Quantity (Q&Q) - Logistics and policy-related updates

Stakeholder	Engagement Topics	Frequency	Value Delivered
Suppliers 	- Email - Website - Vendor Meet - Awareness Sessions - Conferences and Conclaves.	On a requirement basis	Awareness on public procurement policies and procedures, Procurement in Government e-market place, Trade receivables and discounting (TReDS) etc.
Shareholders/ Investors 	- Annual General Meeting - Corporate Website - Press Release - Press Conference	Annually and on a requirement basis.	Financial performance, risk management, corporate governance, dividend.
Employees 	- Circulars - Intranet - Digital Board - E-Mails And SMS	Quarterly and on a requirement basis	Employee benefits, company performance
Communities 	- Community Meetings - E-Mail, Website	On a requirement basis	Environmental awareness and informing about company news/ updates/ alerts
Government/ Regulatory bodies 	- E-Mails - notices - website	On a requirement basis	Regarding compliances on act and rules

In addition, MRPL actively collaborates with national and international industry associations to advocate for sustainable business practices and contribute to sector-wide improvements. Our key associations include:

- Global Compact Network India (GCNI)
- Federation of Indian Petroleum Industry (FIPI)
- Confederation of Indian Industry (CII)
- Standing Conference of Public Enterprises (SCOPE)
- Federation of Indian Export Organizations (FEIO)

These partnerships not only enrich our perspective on evolving ESG trends but also offer platforms to influence policies that advance industry-wide sustainability.

Materiality Assessment

Materiality is the foundation of MRPL's ESG strategy, reporting and performance management. It helps us identify the most relevant environmental, social and governance topics that can impact our business, stakeholders and the broader ecosystem. In FY 2024–25, we continued to work with our validated set of material topics, reflecting their ongoing relevance in our operational context, regulatory landscape and long-term strategic goals.

Our material topics are aligned with leading disclosure standards, including GRI 2021 Universal Standards, SEBI's BRSR framework and key sectoral insights from SASB and MSCI. These topics inform our ESG disclosures, risk registers, sustainability targets and strategy execution.

Methodology

Our structured five-phase approach was designed to comprehensively identify, evaluate and prioritize material ESG issues through internal and external stakeholder engagement.

PHASE I

Topic Identification

A longlist of potential ESG topics was created based on:

- Global ESG standards (GRI 2021, BRSR, MSCI, SASB)
- Industry trends and sector-specific risks
- Peer benchmarking within the oil & gas sector

PHASE II

Stakeholder Mapping

- Identification of key internal (employees, leadership, Board) and external (customers, regulators, NGOs, suppliers, communities) stakeholders
- Prioritization based on influence on business and degree of impact by MRPL's operations

PHASE III

Materiality Survey & Workshops

- Digital surveys and interactive workshops were used to gather feedback on the 21 ESG topics
- Topics were rated on a scale of Low, Medium and High for relevance and impact

This phase helped shortlist **21 ESG topics** relevant to MRPL's operations, risk landscape and stakeholder interests.

PHASE IV

Strategic Review & Risk Integration

- Potential material topics were mapped against MRPL's business objectives to assess their relevance and contribution to risk mitigation.
- Responses from the materiality survey were collected, compiled and analyzed to derive results that informed the development of the materiality matrix.

PHASE V

Materiality Matrix Development

The final Materiality Matrix was plotted with:

- X-axis: Importance to MRPL's business strategy and performance (Impact on business)
- Y-axis: Impact on stakeholders by integrating these assessments, MRPL ensured that its materiality process was both stakeholder-driven and strategically aligned with the Company's overall goals and risk management priorities. This matrix serves as a strategic tool to guide our ESG priorities and reporting focus areas.

Material Topics (FY 2024–25)

The assessment confirmed 21 ESG topics as material, with the following themes emerging as top priorities:

MRPL Materiality Assessment

A detailed mapping of these topics, including related risks, opportunities and financial implications, is disclosed in MRPL's BRSR (Business Responsibility and Sustainability Report). These topics continue to guide MRPL's actions on energy transition, environmental stewardship, social responsibility and governance maturity paving the way for resilient, sustainable growth.

04

ENVIRONMENTAL STEWARDSHIP

Environmental Stewardship

As a key player in India's energy transition, MRPL recognizes its environmental responsibility as a cornerstone of sustainable value creation. In FY 2024–25, we further strengthened our environmental agenda in line with our Net Zero 2038 commitment, focusing on reducing our ecological footprint while enhancing operational resilience. This section of the report presents our comprehensive approach to managing environmental impacts, driven by science-based decision-making, regulatory compliance and stakeholder expectations.

In a rapidly evolving energy landscape, MRPL's environmental stewardship reflects a balanced strategy of mitigation, adaptation and innovation. We have embedded sustainability across our environmental management systems, aligning our operations with ISO 14001, ISO 50001 and other relevant standards. Our efforts span across the responsible use of energy and water, reduction of emissions and waste, promotion of circularity and conservation of biodiversity. These actions are not only central to mitigating environmental risks but also integral to building long-term business resilience and stakeholder trust.

SDG Alignment

Material Topics Addressed

- Energy Management and Efficiency
- Emission Management
- Water Stewardship
- Waste Management and Circularity
- Protection of Biodiversity
- Climate Change Adaptation, Resilience and Transition
- Clean Technology Initiatives
- Product Stewardship

Energy Management

Energy efficiency is central to MRPL's pathway to Net Zero 2038. MRPL has implemented a range of energy optimization measures across our refinery and petrochemical facilities. MRPL's Energy Management System (EnMS) is aligned with ISO 50001 and supported by periodic energy audits. Energy targets and performance are reviewed monthly by senior management.

Renewable energy consumption
2,04,225 GJ
(↑280% Y-o-Y)

Energy intensity per ton of crude consumed
4.15 GJ/MT
(↓4% Y-o-Y)

38,725 MTOE saved
through energy
efficiency projects

Energy intensity
68.60 GJ/INR million
of revenue

Total Energy Consumption (in million GJ)

Energy Intensity (GJ/ton of crude oil consumed)

MRPL achieved notable energy savings through a series of strategic operational optimizations mentioned in the below table. These measures reflect MRPL's ongoing commitment to sustainable practices and energy-efficient operations.

1,044 (MTOE/Annum)

Crude Distillation Unit-2 Hot Light Naphtha routing to Isomerization Unit

5,840 (MTOE/Annum)

Stoppage of Cooling Tower-1 Turbo Drive pump

118 (MTOE/Annum)

Phase-3 Utility Boiler (UB) rotary air pre-heater (RAPH) air leak arresting

1,573 (MTOE/Annum)

Hot Lean Amine routing to Diesel Hydro-treating Unit (DHDT)

11,425 (MTOE/Annum)

Maximization of Grid Power Import (8 MW increase)

4,570 (MTOE/Annum)

Gas Turbine-1 heat rate improvement with Natural Gas

616 (MTOE/Annum)

Light Reformate (LR) Processing in FCC (Fluid catalytic cracking) gasoline Treatment Unit (FGTU) instead of Isomerization Unit

7,441 (MTOE/Annum)

Optimization of Captive Power Plant-1/2/3 machines and maximization of Gas Turbine-2 load

139 (MTOE/Annum)

Gas Booster Compressor's performance optimization in Captive Power Plant-3

5,840 (MTOE/Annum)

Hot Feed Maximization in Delayed Coker Unit

119 (MTOE/Annum)

High Pressure (HP) Desalination Pump impeller trimming

Total Energy Saving

38,725 (MTOE*/Annum)

*1 MTOE (metric ton of oil equivalent) = Fuel equivalent of 10,000 kCal/kg

Emission Management

Our emissions management approach is focused on minimizing greenhouse gas (GHG) emissions, maintaining air quality and complying with national and global environmental standards. MRPL monitors and reports on Scope 1, Scope 2 and material Scope 3 categories, in alignment with GHG protocol standards and regulatory compliances. The company continues to implement energy-efficient technologies, transition to cleaner energy sources and adopt process optimizations that reduce emission intensity without compromising operational efficiency.

Scope 1 and 2 emissions

In FY 2024–25, MRPL achieved measurable progress in reducing emission intensity while expanding the scope of disclosures:

Scope 1 & 2 emissions
5.82
million tCO₂e

Scope 1 & 2 intensity per MT crude oil consumed
0.32 tCO₂e/MT
(↓5.9% YoY)

Scope 1 & 2 intensity per revenue
5.32 tCO₂e/INR million
(↓1.3% YoY)

Scope 1 and 2 emissions (in million tCO₂e)

MRPL continues to advance its decarbonization agenda by focusing on the reduction of Scope 1 (direct emissions from operations) and Scope 2 (indirect emissions from purchased electricity) through a combination of technology upgrades, process optimizations and resource substitution. These efforts are part of our broader Net Zero 2038 roadmap and are guided by national regulations and international best practices.

Scope 1 and 2 emission intensity per MT of crude consumed (tCO₂e/MT)

Scope 3 emissions

Scope 3 emissions: 54.96 million tCO₂e (expanded coverage to 9 categories, adding Business Travel & End-of-Life treatment of products)

In FY 2024–25, total scope 3 emissions stood at **5,49,64,477 tCO₂e**, MRPL enhanced the breadth

of Scope 3 reporting by expanding coverage to nine categories. This step reflects our commitment to comprehensive value chain accountability. With 86% of emissions originating from “Use of Sold Products”. The detailed breakup of category-wise scope 3 is as below:

Air Emissions

Air quality management is a critical aspect of MRPL’s environmental responsibility, especially given the nature of refining and petrochemical operations. Our air emissions management strategy focuses on controlling pollutants such as particulate matter (PM), sulfur oxides (SOx), nitrogen oxides (NOx), carbon monoxide (CO) and volatile organic compounds (VOCs) through preventive design, emissions control technologies and continuous monitoring. All emissions are measured and reported in compliance with national regulations. By integrating air emissions management into broader environmental and health governance frameworks, MRPL aims to protect surrounding ecosystems, safeguard community well-being and ensure regulatory alignment across all operational sites.

Parameter	Unit	FY 2022-23	FY 2023-24	FY 2024-25
NOx	TPA	2,613	2,354	2,190
SOx	TPA	21,301	16,653	17,325
Particulate Matter (PM)	TPA	212	175	172
Volatile Organic Compounds (VOC)	TPA	2.11	1.04	1.40

As part of its commitment to reducing air emissions, MRPL implemented a Wet Gas Scrubber system in the Petroleum Fluidized Catalytic Cracking (PFCC) unit. This advanced system controls emissions of particulate matter and sulfur oxides (SOx) from stack discharges, resulting in a significant reduction in airborne pollutants. The initiative has contributed to improved ambient air quality around the refinery while ensuring compliance with CPCB air emission norms.

Water Management

Water is a vital resource for MRPL's refining and petrochemical operations, playing a critical role in cooling, steam generation and process needs. As part of our broader environmental strategy, MRPL prioritizes efficient, sustainable and equitable water use across our facilities. Recognizing water as a shared and finite resource, we continue to invest in technologies and practices that reduce withdrawal, promote reuse and prevent contamination of local water bodies.

MRPL adopts an integrated water management approach grounded in the principles of reduce, reuse and recycle. Our operations are supported by a dedicated Effluent Treatment Plant (ETP) with advanced tertiary treatment units to ensure that treated water is recovered and reused within the facility. Regular water audits are conducted to identify optimization opportunities and initiatives are implemented to increase internal reuse and reduce freshwater dependence.

In FY 2024–25, MRPL achieved significant improvements in water efficiency through operational optimization and reuse of treated wastewater.

- 💧 **Water consumption:** 22.13 million kL (↓7.7% Y-o-Y)
- 💧 **Water intensity:** 1.23 kL/MT crude processed (↓15.2% Y-o-Y)
- 💧 **Total water withdrawal:** 25.16 million kL (↓16.2% Y-o-Y)
- 💧 **Treated water discharge:** 6.95 million kL (↓38.9% Y-o-Y)
- 💧 **Zero groundwater dependency** sustained across operations
- 💧 **Share of desalinated water:** 22.6% of total withdrawal
- 💧 **Sustained reuse of treated municipal sewage water:** 52.64 million kL

Water Withdrawal by Source

Parameter	Unit	FY 2022-23	FY 2023-24	FY 2024-25
Surface Water	kL	1,71,53,026	1,35,41,904	1,42,24,168
Ground Water	kL	0	0	0
Third Party Water	kL	0	0	0
Seawater/Desalinated water	kL	59,95,405	1,04,86,090	56,77,319
Other – Treated municipal sewage water	kL	61,09,556	60,12,092	52,64,327
Total Water withdrawal	kL	2,92,57,987	3,00,40,086	2,51,65,814

Total Water Consumption (in million kL)

Water Intensity (kL/ton of crude consumed)

Water Conservation Measures

- As part of its efforts to minimize environmental impact, MRPL has been utilizing 3.1 MGD of treated water from the municipal STP. This initiative promotes resource circularity and reduces reliance on freshwater, contributing to more sustainable water management practices.
- MRPL has implemented multiple measures to enhance water conservation and reduce freshwater dependency. Treated municipal sewage from Mangalore is processed through a dedicated RO system for DM and cooling tower make-up.
- A desalination plant at Tannirbhavi ensures reliable water supply during summer shortages.
- Separate wastewater treatment plants for refinery and aromatics effluents meet regulatory standards using advanced technologies like SBR, MBR, and RO.
- Stripped sour water is reused in crude desalting, while condensate recovery units further cut freshwater use.
- The Wet Air Oxidation (WAO) unit and optimized cooling systems, including fin fan and trim coolers, improve treatment efficiency and reduce water requirements.
- Additionally, hydrogen peroxide is used in wastewater treatment to enhance water quality through in-house developed methods.

Water-Discharge related Impacts

MRPL adopts a responsible and forward-looking approach to managing water-related impacts across its operations. Our focus areas include water intake, effluent discharge, leak prevention and safeguarding downstream ecosystems and communities. To ensure compliance and proactively identify risks, we conduct regular water quality monitoring within and around our facilities.

All effluents are treated to meet the Minimum National Standards (MINAS) prescribed by the MoEFCC (2008 notification) for oil refineries. MRPL operates four dedicated Effluent Treatment Plants, commissioned during successive refinery expansions. A significant portion of treated water is recycled back into the Cooling towers for reuse, while the remainder is discharged into the marine environment via a closed pipeline system—minimizing exposure to inland ecosystems and communities. The discharge system is designed with load-based calculation methodologies to ensure compliance with regulatory limits and protect marine ecological balance.

MRPL monitors marine environment through College of Fisheries and The Central Marine Fisheries Research Institute (CMFRI). These expert bodies periodically assess the ecological health of the receiving marine environment.

Waste Management and Circularity

MRPL adopts a proactive and circularity-driven approach to waste management, aimed at minimizing environmental footprint while enhancing resource efficiency. Our strategy is built on the principles of prevent–reduce–reuse–recover–dispose, with a strong focus on closing material loops across operations.

- 💧 In FY 2024-25, MRPL has improved its waste management practices and the performance is as below: Total waste generated: 15,245 MT
- 💧 Waste generation intensity: 0.014 MT/INR million revenue; 0.00085 MT/MT crude consumed
- 💧 Zero oil spills maintained during the reporting period

Detailed breakdown of waste generated from operations

Category of waste generated	Unit	FY 2022-23	FY 2023-24	FY 2024-25
Plastic waste	MT	2,270.40	1,947.90	2,434.00
E-waste	MT	3.36	3.20	213.00
Bio-medical waste	MT	0.53	0.80	1.10
Battery waste	MT	2.40	9.50	17.80
Other hazardous waste*.	MT	9,304.90	7,587.70	9,356.00
Other non-hazardous waste#	MT	3,844.30	4,896.00	3,223.00
Total waste generated	MT	15,425.90	14,445.10	15,244.90

*Other Hazardous waste includes Oily sludge, spent catalyst, spent activated carbon, Discarded Containers, used oil, Furnace Residue etc.

#Non-hazardous waste majorly includes metal scrap and insulation

Breakdown of waste by disposal methods in FY 2024-25

~78%

of total waste processed was diverted from disposal in FY 2024-25

Such closed-loop practices reduce environmental footprint while enhancing operational efficiency.

Comprehensive Standard Operating Procedures (SOPs) have been developed for each category of waste, ensuring strict adherence to statutory norms, MRPL continues to minimize waste-related risks and advance toward sustainable resource use across its value chain. We have maintained zero oil spill during the reporting period.

Management of significant waste-related impacts

All waste generated within MRPL's facilities is managed in full compliance with the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (HWM Rules, 2016), E-waste Rules 2022, Battery Waste Rules 2022 and Plastic Waste Rules 2016 and follow a strict protocol to ensure safe handling, storage and disposal of both hazardous and non-hazardous waste streams.

To manage significant waste-related impacts, MRPL has implemented a series of circularity initiatives such as:

- The reprocessing of slop oil and blending of used oil with crude, thereby recovering valuable hydrocarbons.
- Sludge generated from the Effluent Treatment Plants (ETPs) is sent to the Delayed Coker Unit (DCU) for further thermal recovery, minimizing disposal needs.

Biodiversity and Land Use

MRPL recognizes the importance of biodiversity conservation as a key element of sustainable industrial development. While our operations do not overlap with legally designated protected areas or internationally recognized sites of high biodiversity value, we remain committed to minimizing ecological disruption and enhancing local green cover around our facilities.

- 💧 **Operational footprint:** ~2,034 acres at Mangaluru, India
- 💧 **Greenbelt:** 699 acres developed as ecological buffer and maintained with native species
- 💧 **Protected areas:** None within or adjacent to MRPL's site
- 💧 **Ecosystem:** Predominantly terrestrial, with native flora and fauna; peripheral influence from marshlands and freshwater systems possible, but not directly intersected by operations

Direct and Indirect Impacts on Biodiversity due to our activities, products and services

Potential biodiversity impacts from refining and petrochemical operations include:

- 💧 Habitat fragmentation and disturbance of native ecosystems

- 💧 Local hydrological changes from land use and infrastructure development

- 💧 Risk of pollution through spills, leaks, or runoff

Preventive design and operational measures including effluent treatment, secondary containment and continuous monitoring, are in place to minimize these risks. No introduction of invasive species, pests, or pathogens has been linked to MRPL's activities.

Biodiversity Stewardship Initiatives

- 💧 Development and maintenance of a 699-acre greenbelt with native and adaptive species
- 💧 Afforestation drives and ecological landscaping to support microhabitats and enhances air quality

- 💧 Ongoing ecological monitoring around operational boundaries to identify and manage biodiversity-related risks

- 💧 Habitat-sensitive land use practices to ensure industrial activity does not result in irreversible biodiversity loss

Assessment of Biodiversity Impacts:

- 💧 **Species affected:** No critically endangered species reported within MRPL's operational footprint
- 💧 **Extent & duration:** Impacts largely confined to industrial zones; primarily short-term and reversible (e.g., during construction)
- 💧 **Reversibility:** No evidence of irreversible biodiversity loss; site management and afforestation support long-term resilience

List of IUCN species identified by level of extinction risk:

Endangered

- 💧 *Coffea arabica*
- 💧 *Dipterocarpus indicus*
- 💧 *Syzygium caryophyllatum*
- 💧 *Tectona grandis*

Vulnerable

- 💧 *Dalbergia latifolia*
- 💧 *Hopea odorata*
- 💧 *Hopea ponga*
- 💧 *Santalum album*
- 💧 *Saraca asoca*

Near Threatened

- 💧 *Dypsis lutescens*
- 💧 *Swietenia mahagoni*
- 💧 *Threskiornis melanocephalus*
- 💧 *Eryx whitakeri*
- 💧 *Semnopithecus priam*
- 💧 *Panthera pardus fusca*
- 💧 *Caprimulgus atripennis*
- 💧 *Streptopelia chinensis*

Sustainable Products & Innovation

MRPL's product strategy and innovation agenda focus on three things: serving core markets reliably, improving environmental performance across the product life cycle and building future-ready capabilities. In FY 2024–25, the company strengthened its position in the institutional market, expanded its retail footprint, introduced new products and advanced several technology and process innovations that support safer, cleaner and more efficient operations.

Product Innovation & Growth

- 💧 **Institutional Sales:** 2.99 MMT, revenue ₹15,214 crore (↑22.5% volume, ↑23.6% value YoY).
Products: Bitumen, Diesel, Sulphur, Pet Coke, ATF (JV), Polypropylene, Xylol, Benzene.
- 💧 **Retail Network:** 66 new HiQ outlets commissioned (entry into Tamil Nadu); 167 outlets across Karnataka, Kerala, TN (expansion to Andhra Pradesh initiated).
- 💧 **New Products:** Toluene, Mineral Turpentine Oil (MTO).
- 💧 **Biofuels:** 15.5% ethanol blending under EBP programme.

Product stewardship measures remained central. Polypropylene bags carry recycling labels and product information (grade, batch and quality) is printed on packaging. Material Safety Data Sheets (MSDS) are available on request and HAZCHEM labels are used on tank trucks. MRPL met its Extended Producer Responsibility (EPR) obligation for polypropylene packaging, achieving 2,143 MT in FY 2024–25 (vs. 2,166 MT in FY 2023–24). There were no product recalls on safety grounds.

Innovation at MRPL:

Innovation at MRPL is anchored in the company's mission and executed with rigor. The Innovation Centre spearheads R&D across

refining, petrochemicals, sustainability and Active Pharmaceutical Ingredients (APIs), integrating plant-level problem-solving with advanced analytics and digital tools. The MRPL Innovation Centre has made significant advancements in refinery process optimization, AI/ML-driven systems for process and reliability, petrochemicals, plastic recycling, and pharmaceutical synthesis.

Its outcomes have been widely recognized: in FY 2024–25, MRPL received the Special Innovation Award from the Ministry of Petroleum & Natural Gas for the third consecutive year and was re-recognized by Department of Scientific and Industrial Research (DSIR) (Mar 2025–Mar 2028).

Projects and Infrastructure

During the year, MRPL commissioned a Bitumen train, a PFCC Wet Gas Scrubber and operationalized the Devangonhi Marketing Terminal in Bengaluru. This terminal is fully automated, connected to the PMHBL pipeline and equipped with 81 TKL gross storage, ten-bay truck loading facilities with vapor recovery and ethanol/biodiesel storage and handling.

To diversify crude sourcing and improve margins, MRPL processed new crudes during the year: Kaliningrad, Varandey, Eocene, Peregrino, Sandibinskaya and Merey-16. Additionally, a ₹75 crore treated-water pipeline project using HDPE pipes from ETP-1/2 to the APMC point is underway (target completion: Nov 2025).

Digital and cybersecurity

MRPL is strengthening its digital backbone with advanced ERP systems, AI/ML applications and enhanced cybersecurity. The AI/ML application initiative has earned the “Best Innovation in Refinery” award (MoPNG). The company operates under an ISO/IEC 27001-certified Information Security Management System (ISMS) and is preparing a Data Privacy Framework aligned with India’s Digital Personal Data Protection regime.

R&D and advanced analytics

The Innovation Centre deployed real-time predictive models (polypropylene, power plant, PFCCU) and prescriptive models in hydrotreating, boosting throughput, yield and energy efficiency. A Real-Time Optimization (RTO) system for the PFCC unit—among the first AI/ML-based closed-loop controls at commercial scale—has been implemented.

In circular technology, MRPL is developing Polyethylene Terephthalate (PET) depolymerisation to recover high-purity monomers (pilot targeted by end-2025, supported by a ₹6.67 crore OIDB grant). In pharma, the company developed in-house Isobutyl Benzene (IBB) synthesis (for Brufen) and APIs from low-value streams, with a demo IBB plant targeted for Q3 FY 2026.

By FY 2024–25, MRPL had filed 29 patents (12 granted).

Sustainable operations

MRPL has committed to Net Zero (Scope 1 & 2) by 2038 and is in the process of developing of Net-zero strategy and its implementation plan. Progress in FY 2024–25 included:

- Renewable energy: 8,838 MWh solar energy generated; 56,729 MWh consumed (including purchased solar); 8.76 MW installed capacity.
- Clean fuel transition: Tender floated for a 10 KTPA Green Hydrogen plant (under SIGHT-2B), alongside a 500 TPA pilot (target FY 2026–27); 20 KLPD Bio-ATF unit (feedstocks: palm stearin, UCO, tree-borne oils) targeted for Jan 2027; RLNG facility commissioned.
- Energy efficiency: Savings of 38,725 MTOE; Specific Energy Consumption improved to 70.71 MBN (best-ever since phase 3 commissioning); GHG intensity (Scope 1 & 2) per MT crude reduced by 5.9% YoY.
- MRPL plans to install a 500 TPA Green Hydrogen Plant: As a part of this, the existing Environmental Impact Assessment (EIA) report for refinery capacity expansion has been updated with an addendum to include details of Green Hydrogen Plant.

Water and circularity improvements continued

MRPL advanced water stewardship and circularity, achieving:

- 💧 **57.5% of ETP feed recycled/reused.**
- 💧 **5.68 million m³ desalinated water and 5.26 million m³ treated city sewage water** utilized.
- 💧 **15.17% decline in water-consumption intensity per MT of crude consumed YoY.**
- 💧 **~78% of total waste recycled/reused; 99.75% of hazardous waste diverted from landfill.**
- 💧 **5,259 MT oily sludge reused in DCU; ~41 MT vermi-compost produced.**

05

SOCIAL RESPONSIBILITY

Creating Shared Value for People

At MRPL, people are at the core of our business and the foundation of long-term value creation. Creating shared value begins with empowering our workforce, fostering inclusive growth, ensuring safe workplaces and contributing to surrounding communities. This section outlines our approach to strengthening social capital through strategic investments in human development, health and safety, diversity and social responsibility.

Employee and Workplace Culture

MRPL continues to build a resilient, skilled and motivated workforce through structured learning programs, digital skilling and talent development pathways.

Diversity, Equity and Inclusion (DEI)

Equal opportunity, gender representation and anti-bias sensitization are central to our workplace policies.

Community Development

Through CSR programs, we invest in education, healthcare, livelihood enhancement and infrastructure for surrounding communities. MRPL undertook various projects to support the vulnerable groups reflecting our commitment to inclusive and sustainable development.

Occupational Health and Safety (OHS)

We adhere to ISO 45001 norms and strengthen a culture of zero harm through safety audits, risk assessments and preparedness drills.

SDG Alignment

Material Topics Addressed

- Human Capital Management
- Occupational Health and Safety
- Diversity, Equity and Inclusion
- Human Rights
- Community Development
- Customer Relationship and Experience
- Supply Chain Management

Employees and Workplace Culture

Our workforce is the foundation of our success and the driver of our sustainability vision. MRPL fosters a workplace where employees feel valued, empowered and motivated to contribute their best. Our approach blends skill development, engagement and well-being initiatives with a strong emphasis on ethical conduct, inclusivity and transparency.

Through structured training, open communication and recognition systems, we nurture a high-performance culture that encourages innovation and continuous improvement. Policies such as the HR Welfare Policy, Promotion Policy, Transfer Benefit Policy, Post-Retirement Medical Benefit Facility and the Policy on Remuneration of Directors, KMP & Other Employees ensure fair treatment, equal opportunity and respect for all employees, aligning personal growth with organizational goals.

Employment

- Efficient human resource management supports MRPL's vision of safe, innovative and sustainable energy solutions. We are committed to fostering a supportive and equitable workplace, offering comprehensive benefits, career development opportunities, and fair employment practices that help us attract, retain and grow talent. The snapshot

of our FY 2024-25 workforce is as below:
2,530 employees (**46%** management | **54%** non-management)

- 4,089** non-permanent workers
- 47** new hires – **61.70%** under 30 years

Employee Relations

- Minimum **21-day** notice prior to significant operational changes.
- Long-Term Settlement (LTS) agreement with recognized union covering wage revisions and benefits for **10** years, ensuring transparent consultation.

This framework ensures that operational changes are communicated transparently and discussed collaboratively, fostering trust and constructive engagement between management and the workforce.

Workforce composition by employee category and gender

Employee Category	FY 2022-23			FY 2023-24			FY 2024-25		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Top Management	2	0	2	3	0	3	3	0	3
Senior Management	314	6	320	299	4	303	291	4	295
Middle Management	483	23	506	543	23	566	569	27	596
Associates/ Junior Management	273	34	307	269	43	312	229	39	268
Non-management Employees	1,252	163	1,415	1,205	159	1,364	1,212	156	1,368

Age wise distribution of our total employees (FY 2024-25)

Talent Attraction and Retention

Attracting and retaining skilled talent is critical to sustaining business growth. We are committed to offering a workplace that not only provides competitive compensation and benefits but also fosters professional growth, inclusivity and a sense of purpose. Our talent strategy focuses on building a diverse pipeline of capable professionals through structured recruitment, campus engagement and lateral hiring, while ensuring high retention through continuous learning opportunities, career progression pathways and employee engagement initiatives. By aligning individual aspirations with organizational goals, MRPL creates an environment where people choose to build their careers, contribute to innovation and grow alongside the company.

100%

Return to work rate in FY 2024-25

~2.49%

Overall employee turnover rate in FY 2024-25

Breakdown of new employee hires by category, age and gender

Employee Category	FY 2022-23			FY 2023-24			FY 2024-25		
	Male	Female	Total	Male	Female	Total	Male	Female	Total

Employee Engagement

Employee engagement is rooted in the belief that a motivated, informed and empowered workforce is essential for achieving business and sustainability goals. Our engagement approach goes beyond routine communication, it is about fostering a sense of ownership, pride and shared purpose across all levels of the organization.

The ARISE initiative exemplifies this commitment, serving as both a cultural framework and a strategic roadmap for employee involvement and organizational growth, integrating excellence, adaptability, innovation, safety and sustainability.

A**Attain Excellence** – consistently above operational benchmarks.**R****Ready for the Future** – preparing for diversification into green energy and petrochemicals.**I****Innovation** – empowering a culture of curiosity, experimentation, and breakthrough thinking**S****Safe Culture** – fostering a no-harm mindset through proactive safety systems and continuous engagement across the workforce.**E****Environment** – embedding sustainability into work practices.

Standard Benefits for Full-Time Employees include:

- 💧 Group Term Life Insurance
- 💧 Medical Insurance (hospitalization and related expenses)
- 💧 Disability Support (including transport facilities for employees with special needs)
- 💧 Retirement Benefits including statutory provisions and superannuation

MRPL provides 26 weeks of paid maternity leave in compliance with the Maternity Benefit (Amendment) Act, 2017, ensuring adequate time for childbirth recovery and infant care. Employees availing maternity leave are also supported through flexible working arrangements and special needs leave upon their return to work. Fathers are entitled to 15 days of paid paternity leave, enabling them to actively participate in early childcare responsibilities. The company provides a range of employee benefits and welfare programs, including preventive health check-ups, skill development opportunities and wellness initiatives that promote physical, mental and emotional well-being.

Training and Development

MRPL places strong emphasis on continuous learning and professional growth to ensure that employees are equipped for current roles while being prepared for future opportunities. Our training framework strengthens both technical

Employee Benefits

MRPL offers a comprehensive suite of benefits designed to support the well-being, financial security and work-life balance of its workforce. These benefits are extended to all full-time employees across management and non-management categories.

competencies and behavioral capabilities, building an agile, innovative and future-ready workforce.

Skill Upgradation and Leadership Development

In FY 2024–25, MRPL conducted a range of Management Development Programs (MDPs) for both management and non-management employees. These programs were delivered in-house and in collaboration with reputed institutes such as MDI, NITK, Sahyadri College, NITTE Institute and AIMIT, these programs enhanced leadership qualities, decision-making skills and behavioral competencies. Specialized programs supported employees transitioning from non-management to management roles, ensuring they were equipped with the managerial and leadership skills required in their new positions.

Transition Assistance Programs:

To support employees at different career stages, MRPL runs structured transition programs. During

the year, superannuation training sessions were conducted for employees approaching retirement, offering guidance on financial planning, wellness and post-retirement opportunities. These programs help employees adapt smoothly to life beyond active service which reinforces MRPL's culture of lifelong learning and adaptability.

Training for security personnel:

Ensuring the safety and security of employees, assets and operations is a critical priority for MRPL. In alignment with our commitment to responsible business conduct, MRPL ensures that all security personnel both internal and contracted receive appropriate training that integrates respect for human rights and adherence to statutory requirements. Security at MRPL is primarily managed by the Central Industrial Security Force (CISF), a professional industrial security force under the Ministry of Home Affairs (MHA), Government of India. CISF personnel undergo rigorous initial and refresher training programs as per MHA guidelines,

which include modules on basic human rights, ethical conduct and responsible use of authority. Training is conducted in accordance with the CISF's official Training Policy and Syllabus, ensuring uniformity and compliance across all industrial security deployments.

100%

Of security personnel received trainings on human rights aspects

Additionally, personnel from the Directorate General of Resettlement (DGR) Security Agency and Private Security Agencies are trained in compliance with the PASARA Act. MRPL's Security Department also conducts periodic in-house refresher sessions covering security protocols, emergency response and professional behavior, with strong emphasis on respect for human rights.

All security personnel (516, including women) trained on human rights aspects in FY 2024–25.

Agency-wise training coverage FY 2024–25:

Agency Name	Number of Security Personnel			Number of security personnel received trainings on human rights aspects		
	Male	Female	Total	Male	Female	Total
CISF	247	18	265	247	18	265
DGR	30	0	30	30	0	30
Private Security Agency	218	3	221	218	3	221

Human Rights

MRPL is firmly committed to upholding and promoting human rights across its operations, guided by the principles of fairness, dignity and non-discrimination. Our approach is embedded in organizational policies, employee practices and national compliance standards, ensuring a safe, respectful and inclusive workplace.

Grievance Redressal Mechanism:

MRPL has institutionalized a structured Grievance Redressal Mechanism to address employee concerns, including those related to human rights. Employees may submit grievances directly to the designated committee, which reviews and engages with the concerned individual to seek a fair and transparent resolution. In cases where employees are dissatisfied with the committee's decision, a provision exists to escalate the matter through a formal appeal process. For the contractual workforce engaged through contractors, human rights-related concerns are managed by the respective Engineer-in-Charge (EIC) in collaboration with MRPL's dedicated HR Contract Section. This ensures that grievance resolution is extended to all categories of workers engaged in MRPL's operations, reinforcing inclusivity and accountability.

Zero

Incidents of discriminations reported during FY2024-25

Prevention of Workplace Harassment:

MRPL ensures strict compliance with the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013. Internal Complaints Committees (ICCs) are established at all relevant locations. Awareness and training programs, delivered through both digital modules and workshops, reinforce a gender-sensitive and harassment-free workplace.

Safeguarding Worker Rights

- 💧 In FY 2024–25, MRPL recorded zero incidents of human rights violations, including freedom

of association, collective bargaining, forced or compulsory labor.

- 💧 MRPL enforces a zero-tolerance policy on the violation of human rights, which is strictly applicable to all contractual workers and vendors. This policy ensures that ethical standards are upheld across the organization's operations and supply chain, reinforcing MRPL's commitment to responsible and inclusive business practices.

Zero

incidents of violations involving rights of indigenous people

Through these measures, MRPL strengthens its culture of accountability and reinforces its commitment to safeguarding the dignity and rights of all workers.

Occupational Health & Safety

At MRPL, ensuring the health, safety and well-being of our employees, contractors and stakeholders is a top priority and an integral part of our operational excellence framework. Guided by the principles of zero harm and compliance with global and national standards, we are committed to building a resilient and safety-first culture across all operations of the organization.

MRPL has established a robust Occupational Health and Safety (OHS) Management System, designed to safeguard the well-being of its workforce and ensure compliance with statutory obligations as well as international best practices. The system integrates a structured framework for risk identification, hazard mitigation, emergency preparedness and continuous improvement, with oversight embedded across operational and management levels.

The OHS framework at MRPL is ISO 45001:2018 certified, ensuring alignment with globally recognized standards for occupational safety and risk management. The system extends across all

operational sites, including the refinery complex, booster pumping stations, jetty operations at the New Mangalore Port Authority, Single Point Mooring (SPM) system, the Aromatics Complex and Bangalore office. Importantly, the coverage includes both employees and contractual workforce, reinforcing MRPL's commitment to equitable protection and workplace safety for all categories of workers.

The implementation of this system is supported by periodic safety audits, inspections and internal reviews, which help identify gaps and drive corrective actions. Advanced monitoring systems, coupled with behavior-based safety practices and awareness programs, ensure that health and safety protocols are consistently applied across diverse work environments. By integrating statutory requirements such as the Factories Act, 1948 and the Karnataka Factories Rules, 1969 with industry-specific guidelines from the Oil Industry Safety Directorate (OISD), MRPL ensures that its OHS

practices not only meet compliance requirements but also adopt preventive, forward-looking approaches to risk management. This holistic management system underpins MRPL's vision of achieving zero harm, while embedding a culture of safety, accountability and resilience across its operations.

Workplace Hazard Identification and Safety Practices

Hazard Identification & Risk Assessment

- Routine and non-routine health hazards are identified through medical check-ups, industrial hygiene surveys and targeted health assessments such as urine phenol tests and audiometry for susceptible groups.
- Risk assessments are carried out regularly, with findings integrated into OHS improvement plans.

ISO 45001:2018

Certified OHS system

- Competency of personnel conducting these assessments is ensured through training, supervision and adherence to established protocols.
- Hazard and Operability Studies (HAZOP) and Quantitative Risk Assessments (QRA) are conducted periodically and on a need basis to evaluate critical process risks and strengthen preventive safety measures.

Worker Participation & Reporting Mechanisms

- Safety Suggestion Boxes placed across refinery premises enable workers to report hazards anonymously, ensuring protection against reprisals.
- Employees and contract workers can raise safety concerns during Area Safety Committee Meetings and Monthly Contractor Safety Review Meetings, promoting open dialogue and accountability.

Right to Refuse Unsafe Work

- In compliance with Section 41H of the Factories Act, 1948, all workers have the right to withdraw from tasks perceived as unsafe.
- Processes are in place to escalate such concerns immediately, without fear of retaliation.

Incident Reporting and Investigation

- A structured procedure is followed for incident reporting and root cause investigation, focusing on hazard identification, application of the hierarchy of controls and corrective action planning.
- Learnings from incidents are used to strengthen the OHS management system and prevent recurrence.

Corrective Actions and Continuous Improvement

- Status of corrective actions for reported safety incidents is systematically tracked and documented.
- Findings from hazard assessments and incident reviews are incorporated into ongoing safety improvements, ensuring a cycle of continuous risk reduction.

Occupational Health Services

MRPL operates a comprehensive Occupational Health Service (OHS) framework addressing preventive and responsive needs:

Medical Examinations

Pre-employment, pre-placement and periodic medical checks, with additional assessments for illness recovery or occupational exposure.

Specialized Testing

Targeted tests for at-risk worker groups.

24x7 Medical Support

Onsite facilities staffed with doctors, nurses, EMT technicians and ambulance services.

Quality Assurance

Facilities equipped with modern equipment and supported by ongoing training of medical and paramedical staff.

Worker Participation and Consultation in OHS

MRPL recognizes that effective occupational health and safety management requires active participation and consultation with the workforce. Employees are directly involved in hazard identification, risk assessment, determination of controls and incident investigations, ensuring that safety measures reflect on-ground realities. Workers also contribute through Safe Work Method Statements, Job Safety Analyses, toolbox meetings and periodic policy reviews, embedding safety into daily operations.

To formalize this engagement, MRPL has established joint management–worker health and safety committees across operational levels, including Area Safety Committees, Central Safety Committee meetings and structured management reviews. These committees meet at regular intervals to:

- Review accidents, near misses and investigation outcomes
- Assess the scale of safety concerns and evaluate risks

- Decide and implement corrective actions to prevent recurrence

MRPL remains committed to maintaining a safe and healthy workplace for all personnel. In FY2024–25, the company recorded zero fatalities and zero Lost Time Injury Frequency Rate (LTIFR) per million hours worked in the employee category. In the contractual workforce category, there was one fatality and an LTIFR of 0.471 per million hours worked.

Training on Health and Safety

MRPL ensures that all employees and contract workers are equipped with the knowledge and skills necessary to work safely, prevent incidents and respond effectively in emergencies. Training programs are designed to cover both generic occupational health and safety (OHS) aspects and job-specific hazards, ensuring comprehensive preparedness across the workforce.

- Induction Training:** Half-day mandatory program covering processes, emergency response, first aid, firefighting, ISO standards and behavioral safety.
- Job-Specific Training:** Tailored in-house modules for high-risk activities.
- Assessment of Needs:** Based on audits, technological changes, statutory compliance and role transitions.
- Design & Delivery:** Interactive formats, delivered during paid hours, free of cost, in multiple languages for accessibility.
- Effectiveness Evaluation:** Feedback forms and reviews by the Training Department ensure continuous improvement.
- Health Awareness:** Induction sessions by the Medical Officer highlight health facilities available at MRPL and township.

Diversity, Equity & Inclusion

At MRPL, diversity is not just a demographic measure, it is a strategic driver of innovation, operational excellence and long-term resilience. We believe that an inclusive workplace, where individuals are valued for their unique perspectives and backgrounds, enables richer collaboration and more effective problem-solving. Guided by the principles of fairness, respect and meritocracy, our DEI approach is deeply integrated into recruitment, training, career development and workplace culture.

We are committed to promoting equitable opportunities across gender, age groups, abilities and other dimensions of diversity. Our governance bodies, management teams and workforce combine seasoned expertise with fresh perspectives, ensuring both stability and adaptability. Policies on equal opportunity, non-discrimination and workplace safety are actively implemented and periodically reviewed for effectiveness.

In FY 2024–25, MRPL engaged 3,786 contractual male and 303 contractual female workers. Among permanent employees, the workforce comprised 1,092 men and 70 women in management roles and 1,212 men and 156 women in non-management positions. We are strengthening our talent pipeline through merit-based hiring, capability building, 100% minimum-wage compliance, full accessibility under the RPwD Act and near-universal PoSH and human-rights training coverage.

Percentage share of employee by category, age and gender.

Total Employee Details by Category, Age and Gender						
Categorisation	FY 2022-23		FY 2023-24		FY 2024-25	
	Total	Female %	Total	Female %	Total	Female %
By Employee Category						
Top Management	2	0%	3	0%	3	0%
Senior Management	320	1.88%	303	1.32%	295	1.36%
Middle Management	506	4.55%	566	4.06%	596	4.53%
Associates/Junior Management	307	11.07%	312	13.78%	268	14.55%
Permanent Workers	1415	11.52%	1364	11.66%	1368	11.40%
By Age						
<30	263	11.03%	296	11.49%	242	10.74%
30-50	1847	9.26%	1778	9.45%	1828	9.46%
>50	440	5.91%	474	5.70%	460	5.87%

We are dedicated to ensuring that all employees receive equal rights and respect, regardless of gender, ethnicity, cultural background, age, region, caste, religion, marital status, race, disability, or language. Pay equity at MRPL reflects both our commitment to fair remuneration and the progress made in closing gender gaps, with women in certain categories such as Middle Management earning at par or above their male counterparts, while targeted measures continue to address disparities in others.

Ratio of the basic average salary and remuneration of women to men for each employee category in FY 2024-25:

Categorization	Average Basic salary	Average Total Remuneration
Senior Management	0.87	0.88
Middle Management	1.02	0.98
Associates/ Junior Management	0.90	0.86
Non-management employees*	0.94	0.81

**Employees in unionized category*

Community Development

At MRPL, our journey is deeply connected with the lives of the people who live in and around our areas of operation. We believe that business success is not just measured in profits, but in the prosperity and we help cultivate within the communities we serve. Our community development efforts are not one-off interventions but carefully curated initiatives that align with national priorities and the grassroots aspirations of local stakeholders.

Guided by our Corporate Social Responsibility and Sustainable Development Policy, MRPL's approach is structured, inclusive, and evolving. Over the years, we've broadened our horizons from embedding Swachh Bharat initiatives into our fund allocation to revising the approval processes to ensure efficient and impactful execution. We aim not just to provide aid, but to empower communities by providing them the tools, infrastructure, and support needed to thrive in a changing world. We continue to focus on education, healthcare, sanitation, and infrastructure, believing this form the backbone of resilient communities. An established CSR & SD Committee that reviews and refines our strategies regularly, provides strategic oversight to ensure that MRPL's CSR portfolio is both stakeholder-driven and impact-oriented. The Company's CSR projects are in alignment with Schedule VII of the Companies Act, 2013. The CSR and SD Policy may be accessed on the Company's website at: [MRPL CSR & SD Policy](#).

MRPL's community development agenda is built on a structured and inclusive stakeholder engagement process that encompasses planning, identification, consultation, and transparent reporting. We engage with communities through both formal and informal channels including community meetings, emails, and our corporate website. Prior to implementing CSR initiatives, MRPL consults with community representatives and local authorities to align interventions with local priorities, thereby ensuring relevance, responsiveness, and long-term impact.

MRPL undertakes its Corporate Social Responsibility (CSR) initiatives under five key thematic areas:

a) Shiksha Samrakshan (Education Protection):

MRPL has supported the construction and renovation of classrooms in various schools and

anganwadis. The company has facilitated the disbursement of scholarships, uniforms, notebooks, and mid-day meals to students at nearby schools. Additionally, infrastructure support such as benches, desks, and purified drinking water units has been provided to schools and colleges across Karnataka.

b) Arogya Samrakshan (Health Protection):

MRPL has supported the construction of toilets for boys and girls in schools and public places. We have consistently organized Free Artificial Limb Camps for the past 19 years, benefitting amputees and persons with disabilities. Other significant projects include the procurement of Medical Equipment (ECG machines) for health and wellness centres in Dakshina Kannada, renovation and modernization of the Limb Centre at Government Wenlock Hospital, supply of millets to HIV inmates, destitute individuals, and old age homes in the district,

and promotion of Vita Poshan—an affordable nutritious product made by Women Self-Help Groups (SHGs) in Yadgir. Additional initiatives include providing CB-NAAT machines for TB detection at government facilities, supporting medical camps through the National Medicos Organisation under Mangala Swasthya Sewa Yathra 2.0, setting up drinking water facilities for government schools, and supporting the operation of two free primary health centres in neighbouring villages.

c) Bahujan Samrakshan (Marginalized Community Protection):

Projects under this focus area include the repair and renovation of Dr. B.R. Ambedkar Bhavan at Kenjar and Ambedkar Nagar, construction of a de-addiction centre in Kasaragod (Kerala), an old age home at Vittal (D.K.), and basic amenities for working women’s hostels in Konchady and Kankanady. MRPL has also supported the construction of community halls for fishermen and Scheduled Tribe groups, as well as the renovation of infrastructure for the Karavali Women Writers and Readers Association in Mangaluru.

d) Prakruti Samrakshan (Nature Protection):

MRPL has strengthened Taluk Veterinary Hospitals in nine taluks of Dakshina Kannada by providing operation tables, OT lights, and

related equipment through the Department of Animal Husbandry and Veterinary Services. Other initiatives include the rejuvenation of an old lake near Shree Chandrashekar Temple in Moodubidire and financial assistance to the Govardhanagiri Trust Gaushala in Udupi.

e) Sanskrithi Samrakshan (Cultural Protection):

MRPL supports the promotion of local arts and culture by improving infrastructure facilities at various locations, including establishing a cradle-making unit in Kalghatagi, Dharwad district.

Highlights of CSR Projects executed in FY2024-25

Major CSR Initiatives in FY2024-25:

- CB-NAAT machines to various districts in support of eradicating the TB.
- Distribution of ECG machines to Primary Health Centre of Rural areas.
- Exterior painting to the government schools of MRPL surrounding schools
- Infrastructure facility and medical equipment's to PHCs.
- Millets distribution for HIV inmates and Senior Citizens in Dakshina Kannada.
- Free Artificial Limb camp to the Endosulfan victims.

- 💧 Drinking water purifiers to Schools, Government Hostels and Anganawadis
- 💧 Construction of additional classrooms, toilets blocks including Anganwadi centres

MRPL also extends its support to Aspirational Districts by providing financial assistance for the marketing of Vita Poshan, a nutritious product developed by Women SHGs in Yadgir, and by funding the repair, renovation, and enhancement

of basic infrastructure—including toilet blocks and classrooms—at government schools in Hunasihalahuda and Gunjahalli, Raichur district.

In addition, MRPL has committed substantial financial support for the establishment of a new Astronomy and Space Science Gallery at the Pilikula Regional Science Centre near Mangaluru, procurement of a cancer detection mobile facility, and construction of a palliative care centre in Mangaluru. Further, MRPL has also committed support for the construction of additional floors at Wenlock Government Hospital in Mangaluru during FY 2024–25.

Responsible Value Chain

A responsible value chain is foundational to MRPL's ability to deliver sustainable, ethical and resilient operations. We recognize that responsibility extends beyond our gates from procurement and manufacturing to logistics, dealers, and the end consumer. We encourage every partner in our value chain to uphold standards of fair labor, non-discrimination and respect for human rights, guided by MRPL's core values of integrity, sustainability and social responsibility. This commitment is operationalized through strict regulatory compliance, product stewardship and a preference for local sourcing where feasible, alongside proactive supplier engagement including supplier assessment, capacity-building and regular monitoring to minimize environmental and social impacts and ensure ethical, resilient supply chains.

Regulatory Details

MRPL strictly complies with all applicable local, national and international regulations across the value chain. Environmental, health & safety (EHS), labor and human-rights requirements are embedded in procurement contracts, supplier declarations and tender terms. Procurement is governed by the Material Management (MM) Manual and e-procurement systems. Supplier pre-qualification and due diligence, Material Safety Data Sheet (MSDS) checks, periodic monitoring, risk-based audits and corrective-action plans ensure compliance, with results reported to senior management for continuous improvement.

Supplier Engagement

Engaging with our suppliers is a key part of MRPL's responsible value chain. In FY 2024-25, we ran capacity-building sessions (more than 350 vendors and 75 retail outlet dealer participants) to raise vendor awareness of ethical business practices and sustainable procurement. We work closely with suppliers through training and collaborative initiatives to improve environmental and social outcomes and to build long-term, sustainable relationships.

All suppliers are screened as per the General Conditions of Contract, with clauses on environmental, social, labour practices and quality compliance to ensure alignment with our internal controls and statutory requirements. We handle supplier-specific grievances through MSME

Champion (Micro, Small and Medium Enterprises Champion), Samadhan, CPGRAMS (Centralized Public Grievance Redress and Monitoring System) and IEMs (Independent External Monitors) portals.

Supplier & Transport Partner Development:

- 💧 Safety enablement for transport partners: comprehensive trainings for all PCVOs and TT crews, including simulation-based Defensive Driver Training (DDT) and road-transport emergency mock drills.
- 💧 Health and welfare measures at logistics hubs: eye-testing camps with free spectacles where required and upgraded canteen and rest facilities at loading locations.

- Incident learning and assurance: investigation of all accidents, organisation-wide sharing of lessons learned and verification of corrective actions through follow-up audits.
- Marine interface controls: hygiene notices issued to vessels and Port Health Officer clearances obtained prior to loading/unloading, with heightened protocols during health emergencies.

100%

of value-chain partners assessed (by value of business) for health & safety and working conditions

100%

of hired crude and export vessels complied with MARPOL environmental requirements

Local sourcing

We prioritise sourcing from local suppliers to support nearby economies, reduce our environmental footprint, and deliver positive

social outcomes. Our inclusive approach not only promotes economic development but also fosters innovation and diversity within our supply chain. Partnering with suppliers whose operations and upstream transport are within India helps us secure reliable, high-quality materials and services while creating local jobs and income. Local sourcing also supports our sustainable procurement goals by reducing transport-related emissions, cutting waste and improving operational efficiency and resilience. Through this approach, MRPL contributes to natural-resource conservation and the broader effort to address climate change.

We actively promote local procurement through the Public Procurement Policy for Micro and Small Enterprises (MSEs), using measures such as purchase preferences, EMD (earnest money deposit) waivers and relaxed eligibility criteria to encourage MSE participation. Over the year we invested in vendor development—running awareness sessions, guiding suppliers on GeM (Government e-Marketplace) and TReDS (Trade Receivables Discounting System), and holding targeted meets that helped onboard new SC/ST-owned MSEs and 3.9% from women-owned MSEs², with a substantial share of our purchases coming from domestic suppliers—an outcome that reflects our firm commitment to strengthening local businesses and supply-chain resilience.

Highlights of local sourcing in FY2024-25:

54.82%³

Share directly sourced from MSMEs/small producers

21.78%

Directly sourced from supplier within India

² The calculation excludes procurements made through Single Tender, Proprietary items, Plant and Machinery orders with individual line items exceeding ₹50 crore, Ethanol purchases and Crude oil procurement

³ The percentage of inputs sourced from MSMEs/small producers excludes the following categories: (a) Crude purchases, (b) Single tender procurements, (c) Proprietary orders, (d) Plant and machinery orders with a single line-item value of ₹50 crore or more and (e) Ethanol-related purchases.

Our Customers

Customers are at the very core of our business. As a trusted supplier of fuels, petrochemicals, and value-added products, we are committed to delivering safe, reliable, and sustainable energy solutions that meet evolving customer and market needs. By integrating sustainability into our product portfolio and services, MRPL strives to enhance customer satisfaction, support the energy transition, and contribute to a more sustainable future.

MRPL maintains long-term partnerships with customers, dealers, and distributors through a combination of structured engagement and responsive service delivery. Engagement is strengthened through customer outreach programs, grievance redressal mechanisms, and periodic satisfaction surveys, which provide insights into evolving preferences and service quality expectations. We are also leveraging digital platforms and customer relationship management tools to capture feedback in real time and ensure timely redressal of concerns.

To foster meaningful engagement, MRPL emphasizes mutual trust and transparency by sharing relevant product, safety, and sustainability information with stakeholders. Formal agreements, including performance-linked memorandums of understanding (MoUs) and contractual commitments, reinforce accountability and clarity in expectations.

Zero

complaints of data breaches, unfair practices and product recalls in reporting year

Product Information and Safety measures

We are committed to ensuring that all its products are delivered with comprehensive information and safeguards that promote safe handling, responsible use, and environmental compliance. Our approach goes beyond statutory requirements to build customer trust and enhance product stewardship.

Product Information

- 100% of petroleum product tank trucks are equipped with HAZCHEM labels to communicate environmental and safety parameters during transit.
- Material Safety Data Sheets (MSDS) are made available to all stakeholders on request, enabling safe handling and usage practices.
- 100% of polypropylene (PP) packaging bags carry recycling labels, guiding stakeholders on responsible disposal.

Consumer Awareness and Education

- 💧 Polymer bags are printed with clear instructions in line with plastic waste management guidelines.
- 💧 Product-related details and technical specifications are accessible through the company's website.
- 💧 Retail outlets display safety signage, banners, and dos and don'ts boards to raise consumer awareness on responsible product use.
- 💧 Dealers, distributors, and retail outlet staff undergo regular training programs to ensure accurate and consistent communication of product safety information to consumers.

Additional Product Information and Feedback Mechanisms

- 💧 Polypropylene packaging includes information such as grade name, batch number, and quality type, while detailed product specifications are shared with customers as per requirement.
- 💧 MRPL regularly conducts customer feedback surveys to assess product and service satisfaction across key operating locations, using inputs to improve offerings and enhance customer experience.

Grievance Redressal Mechanism

MRPL has established transparent and accessible channels for customer feedback and complaint resolution, ensuring that concerns are addressed promptly and effectively.

- 💧 Feedback and Complaint Channels: Customers can share product- or service-related issues through direct emails to the concerned Sales Officers, or by recording them in the complaint registers and suggestion books available at all retail outlets.
- 💧 Customer Communication: To maintain trust and minimize disruption, MRPL proactively communicates with both institutional and retail customers on matters related to product availability and service continuity.
- 💧 Risk Notifications: In case of potential disruptions or discontinuation of essential services, MRPL leverages multiple communication modes such as emails, telephone calls, social media updates, SMS alerts, and public notices, ensuring timely and transparent dissemination of information.
- 💧 Regional and Channel Support: The company's network of regional offices and channel partners acts as an extended support system, providing localized grievance redressal and quick escalation where required.

07

GOVERNANCE AND ETHICAL LEADERSHIP

Governance and Ethical Leadership

At Mangalore Refinery and Petrochemicals Limited (MRPL), governance is not just a compliance requirement, it is the foundation of our organisational ethos. We believe that sustainable growth can only be achieved through transparent decision-making, responsible leadership and an unwavering commitment to ethics.

Our governance framework aligns with national regulations, including SEBI guidelines, the Companies Act, 2013 and Department of Public Enterprises (DPE) directives, while also incorporating global best practices. This ensures that we balance the interests of all stakeholders, safeguard the environment and create lasting value for society.

By embedding ethical principles and sustainability considerations into our strategy, we strengthen trust, manage risks effectively and remain resilient in a changing business landscape.

Governance Structure and Board Oversight

Board of Directors

The Board of Directors at MRPL provides strategic guidance, ensures effective oversight and upholds the highest standards of corporate governance. Our Board composition reflects a blend of executive leadership, government-nominated expertise and independent perspectives, ensuring that decision-making is balanced, transparent and aligned with stakeholder interests.

As a Government of India enterprise under the Ministry of Petroleum and Natural Gas (MoPNG), Directors are appointed based on their professional experience, domain expertise and proven leadership. The Board is supported by dedicated committees to oversee specific governance areas including audit, risk management, CSR & sustainability, remuneration and stakeholder engagement.

Board Composition (as on 31 March 2025):

- Directors
- Non-Executive Nominee Directors
- Non-Executive Independent Directors

Board Committees

MRPL has constituted seven committees of the Board to streamline decision-making, strengthen oversight and ensure that governance principles are embedded in operational and strategic functions. These committees comprise Executive Directors, Non-Executive Nominee Directors and Independent Directors, ensuring diverse expertise and balanced perspectives.

The seven committees are:

- 1. Audit Committee:** Oversees MRPL's internal controls and financial reporting processes, ensuring compliance with Section 177 of the Companies Act, 2013 and Regulation 18 of SEBI (LODR) Regulations, 2015. All the members bring in expertise in finance, taxation, economics, risk, and international finance, enabling the Committee to provide strong oversight and guidance in safeguarding transparency and accountability.
- 2. Nomination & Remuneration Committee:** Approves remuneration, allowances and perks in line with DPE and MoPNG guidelines and oversees performance-linked pay for executives. Manages succession planning and leadership development.

- 3. Corporate Social Responsibility & Sustainable Development Committee:** Oversees the formulation, implementation, and monitoring of MRPL's CSR policy and initiatives in line with the Companies Act, 2013, CSR Rules, 2014, and DPE guidelines. It ensures effective allocation of funds, compliance with statutory requirements, and evaluation of project outcomes, thereby driving sustainable and equitable community development through MRPL's "Samrakshan" program.
- 4. Risk Management Committee:** Reviews and monitors the Company's risk overview document on a quarterly basis in line with the Board-approved Enterprise Risk Management (ERM) Policy and submits its findings and recommendations to the Audit Committee for further oversight.

- 5. Stakeholder Relationship Committee:** Reviewing and addressing shareholder grievances in line with Section 178 of the Companies Act, 2013. Its terms of reference have been revised in accordance with the SEBI (LODR) Amendment Regulations, 2018, ensuring timely redressal of investor concerns and strengthening transparency in stakeholder communication.
- 6. Committee of Directors (Board Sub-Committee):** Approves operational and financial decisions delegated by the Board, enabling timely execution of key matters.
- 7. Project Appraisal & Operations Review Committee:** The Committee is constituted to assist the Board in evolving, monitoring, and reviewing systems for managing Health, Safety, and Environmental (HSE) matters, while ensuring full compliance with applicable statutory and regulatory requirements.

Board–Committee Membership Matrix (as on 31 March 2025)

Board Member	Board	Audit Committee	CSR & SD Committee	Nomination & Remuneration Committee	Stakeholder Relationship Committee	Project Appraisal & Operations Review Committee	Risk Management Committee
Shri Arun Kumar Singh Chairman Non-Executive Director (ONGC Nominee)	✓ (Chair)

Remuneration & Performance Evaluation

In compliance with statutory provisions, listed companies are required to disclose in their Board's Report the methodology adopted for the annual evaluation of the Board, its committees, and individual Directors, including criteria for assessing Independent Directors as determined by the Nomination and Remuneration Committee (NRC). While the Ministry of Corporate Affairs (MCA) has exempted Government companies from this requirement where performance evaluations are undertaken by the concerned administrative Ministry or Department, such exemptions do not extend to listed entities under SEBI (LODR) Regulations, 2015. Accordingly, MRPL's Board carries out the evaluation of Independent Directors in line with SEBI's prescribed framework, including the circular SEBI/HO/CFD/CMD/CIR/P/2017/004 dated January 5, 2017, thereby ensuring compliance with regulatory expectations and reinforcing accountability in governance practices. MRPL's remuneration approach is

designed to be fair and transparent in line with the Department of Public Enterprises (DPE) guidelines, SEBI regulations and the Companies Act, 2013.

The Nomination and Remuneration Committee (NRC) oversees:

- 💧 Remuneration policies for Executive Directors and senior management.
- 💧 Performance evaluation of the Board, its committees and individual Directors.

For complete remuneration details, see Corporate Governance Report, **MRPL Annual Report FY 2024–25**.

Policy Framework & Governance Practices

At MRPL, policies form the foundation of our governance architecture, providing clear direction, operational discipline and alignment with ethical, environmental and social commitments. These policies are:

Grounded

in Indian statutory requirements (SEBI, DPE, MoPNG, Companies Act).

Reviewed

periodically to reflect evolving business models and stakeholder expectations.

Integrated

into decision-making across functions.

This structured approach ensures that governance at MRPL is not just about compliance, but about building trust, transparency and sustainable value creation.

Policy Suite at MRPL

Policy Area	Policy & Link	Coverage
Safety & Environment 	Integrated Management System Policy	Framework to ensure quality, safety, environmental protection, energy efficiency, and legal compliance across operations.
Information Management 	Information Security Policy	Framework for protecting company information and digital assets.
	Privacy Policy	Data handling, confidentiality and privacy commitments.
Investor & Financial 	Dividend Distribution Policy	Guidelines for determining and declaring dividends.
	Material Subsidiary Policy	Oversight framework for significant subsidiaries.

Policy Area	Policy & Link	Coverage
Sustainability & CSR 	CSR & Sustainable Development Policy	Guidelines for planning, implementing and monitoring CSR projects in alignment with Schedule VII of the Companies Act.
Governance & Ethics 	Code of Conduct for Board & Senior Management	Ethical responsibilities, conflict of interest and decision-making standards for leadership.
	Whistleblower Policy	Mechanism for reporting unethical conduct, fraud, or policy violations confidentially.
	Board Diversity Policy	Commitment to maintaining diversity of skills, gender, experience and perspectives on the Board.
	Policy on Remuneration of Directors, KMP & Other Employees	Framework for fair and transparent remuneration practices.
Risk & Compliance 	Disclosure of Material Events & Information Policy	Criteria and process for timely public disclosure of material events.
Workforce & Welfare 	Promotion Policy	Promotion eligibility, assessment process and internal mobility.
	Post-Retirement Medical Benefit Facility (Internal)	Medical benefits and coverage for retired employees.
	Transfer Benefit Policy (Internal)	Entitlements and allowances for employee transfers.
	HR Welfare Policy (Internal)	General welfare measures for employees.

More information on MRPL's policies and practices are available in Section B of the BRSR (Business Responsibility and Sustainability Report) for FY 2024–25

Ethical Business Practices

At MRPL, we believe that **integrity, accountability and fairness** are non-negotiable in how we conduct business. Our governance framework is anchored in ethical leadership, fostering trust with customers, employees, investors, suppliers and the community.

Code of Conduct

MRPL's governance framework is anchored in its Code of Conduct, which applies to Board Members and Senior Management Personnel and outlines the standards of ethical behavior, integrity, and compliance with applicable laws and regulations. The purpose of the Code is to promote honest and ethical conduct, ensure fair dealing, and uphold accountability in decision-making. Key provisions include compliance with laws, upholding conflict of interest, confidentiality, and fair and transparent practices. MRPL ensures that all concerned personnel are made aware of the Code and are expected to adhere to its principles in both letter and spirit. MRPL monitors compliance and performance through its governance mechanisms, reinforcing its commitment to corporate responsibility and sustainable growth.

MRPL's General Code of Conduct applies to all employees and promotes honesty, integrity, and ethical behavior. It ensures compliance with laws, encourages fair workplace practices, and supports responsible conduct across all operations.

Managing Conflict of Interest

MRPL has a Code of Conduct for the Board of Directors and Senior Management that guides prudent judgment to avoid situations involving conflict of interest. Directors are required to submit declarations of interest, including details of relatives and related parties, in accordance with the Companies Act, 2013. All related party transactions, including those involving relatives of Directors, are reviewed by the Audit Committee to ensure transparency and compliance.

Anti-Bribery, Anti-Corruption & Insider Trading Measures

MRPL is committed to conducting its business with integrity and transparency. The company adheres to all applicable laws and regulations related to anti-bribery and anti-corruption and promotes ethical conduct across all levels of the organization. MRPL's governance framework includes mechanisms to prevent unethical practices and ensure compliance with statutory requirements.

MRPL has implemented the Code of Internal Procedures and Conduct for Prohibition of Insider Trading in dealing with its securities. This Code applies to all insiders, including Connected Persons and Designated Persons, and is aligned with the SEBI (Prohibition of Insider Trading) Regulations, 2015. The Compliance Officer, designated by the Board, is responsible for monitoring adherence to the Code, preserving unpublished price sensitive information, and overseeing trades. No political contributions made by MRPL in FY 2024–25.

Whistleblower Mechanism

Employees and stakeholders can report any unethical behavior, fraud, or violations of our Code of Conduct through a confidential channel. Complaints can be submitted via email, written letter, or through our online portal. For serious concerns, individuals can directly reach out to the Chairperson of the Audit Committee. We ensure complete protection for whistle-blowers against any form of retaliation.

Public Policy Engagement

MRPL contributes to the development of public policies and industry standards by actively engaging with key government and regulatory bodies such as the Ministry of Petroleum & Natural Gas (MoP&NG), Oil Industry Safety Directorate (OISD), Centre for High Technology (CHT), and the Petroleum and Natural Gas Regulatory Board (PNGRB). Through these channels, MRPL provides technical inputs and supports policy formulation and standard-setting initiatives aimed at advancing national energy priorities and public welfare. Engaging in public policy development enables MRPL to influence regulations that impact the industry and to support beneficial policies. Responsible advocacy enhances the company's reputation and aligns its business practices with societal needs.

Risk & Crisis Management

Operating in a dynamic and volatile oil and gas market, MRPL recognizes the importance of a robust risk governance framework to safeguard business continuity and stakeholder value. In accordance with the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, MRPL has established and implemented a comprehensive Enterprise-wide Risk Management (ERM) Policy across the organization. Our Enterprise Risk Management (ERM) system, overseen by the Risk Management Committee of the Board, which ensures systematic identification, assessment and mitigation of risks across all business areas. The Risk Management Committee conducts periodic reviews of risk assessments and mitigation strategies, and subsequently reports its findings to the Audit Committee and the Board of Directors, ensuring effective oversight of risk management practices.

The ERM framework covers financial, operational, market, compliance and environmental risks. Operational and safety risks are managed through MRPL's ISO-certified Integrated Management System (IMS), embedding international standards for quality, environment and occupational health and safety. Business continuity and disaster preparedness plans are regularly updated to strengthen resilience. Furthermore, MRPL's Net Zero 2038 commitment reflects its preparedness to address climate-related transition risks in a structured manner.

Risk Governance Structure

Key risks identified for ERM are:

- 💧 Pressure on Gross Refining Margin (GRM) on account of volatility of crude/product prices
- 💧 Inability to achieve planned retail expansion targets
- 💧 Delayed availability of land impacting commencement of expansion projects
- 💧 Foreign currency fluctuations impacting profitability
- 💧 Oil seepage / spillage from oil tanks, equipment, pipelines within refinery
- 💧 Breach in physical security at refinery and sabotage on pipelines owing to potential terrorist attacks/threat of aerial objects
- 💧 Cyber intrusions in IT systems leading to business disruption
- 💧 Inability to adopt to global decarbonization strategies
- 💧 Weak data protection controls leading to loss of restricted and/or confidential data
- 💧 Geopolitical tensions and imposed trade sanctions impacting MRPL's financial transactions and availability of grade crude

For detailed disclosures on risk categories and its treatment plan, see Enterprise Risk Management, MRPL Annual Report FY 2024-25 on page 29.

Business Continuity and Disaster Management Plan

MRPL has a comprehensive Emergency Response and Disaster Management Plan (ERDMP) that includes both On-Site and Off-Site Emergency Plans. The On-Site Plan, approved by the Directorate of Factories, Boilers, Industrial Safety & Health, Government of Karnataka, covers multiple accident scenarios with defined mitigation measures. To ensure preparedness, biannual mock drills are conducted across operational sites.

The Off-Site Emergency Plan, approved by the Chairman of the District Disaster Management Authority (DDMA), Dakshina Kannada, addresses natural disasters such as floods, earthquakes, cyclones, and pandemics. It is developed in accordance with PNGRB guidelines and DDMA directives.

Additionally, the Emergency Response & Disaster Management Plans for both the Refinery and Aromatics Complex have been successfully recertified, reinforcing MRPL's commitment to operational resilience and community safety.

	2-29 Approach to stakeholder engagement	Stakeholder Engagement	17, 18
	2-30 Collective bargaining agreements	Social	43

GRI STANDARD	DISCLOSURE	SECTION IN THE REPORT	PAGE NO.
GRI 3: Material Topics 2021	3-1 Process to determine material topics	Materiality Assessment	19, 20
	3-2 List of material topics	Materiality Assessment	19, 20
GRI 11.1: GHG emissions	11.1.1 Management of material topics	Environment → Energy Management, Emissions Management, Materiality Assessment	20, 23, 25
	11.1.2 Energy consumption within the organization	Environment → Energy Management	23
	11.1.3 Energy consumption outside of the organization	Environment → Energy Management	23
	11.1.4 Energy intensity	Environment → Energy Management	23
	11.1.5 Direct (Scope 1) GHG emissions	Environment → Emissions Management	25
	11.1.6 Energy indirect (Scope 2) GHG emissions	Environment → Emissions Management	25
	11.1.7 Other indirect (Scope 3) GHG emissions	Environment → Emissions Management	25, 26
	11.1.8 GHG emissions intensity	Environment → Emissions Management	25
GRI 11.2: Climate adaptation, resilience and transition	11.2.1 Management of material topics	Environment → Energy Management, Emissions Management, Materiality Assessment	20, 23, 25
	11.2.2 Financial implications and other risks and opportunities due to climate change	Governance	68
	11.2.3 Reduction of GHG emissions	Environment → Energy Management, Emissions Management	24, 25
GRI 11.3: Air emissions	11.3.1 Management of material topics	Environment → Emissions Management, Materiality Assessment	20, 25

GRI STANDARD	DISCLOSURE	SECTION IN THE REPORT	PAGE NO.
GRI 11.3: Air emissions	11.3.2 Nitrogen oxides (NOx), sulfur oxides (SOx) and other significant air emissions	Environment → Emissions Management	26
GRI 11.4: Biodiversity	11.4.1 Management of material topics	Environment → Biodiversity Management, Materiality Assessment	20, 32
	11.4.2 Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas	Environment → Biodiversity Management	32
	11.4.3 Significant impacts of activities, products and services on biodiversity	Environment → Biodiversity Management	32
	11.4.4 Habitats protected or restored	Environment → Biodiversity Management	32
	11.4.5 IUCN Red List species and national conservation list species with habitats in areas affected by operations	Environment → Biodiversity Management	33
GRI 11.5: Waste	11.5.1 Management of material topics	Environment → Waste Management and Circularity, Materiality Assessment	20, 30
	11.5.2 Waste generation and significant waste-related impacts	Environment → Waste Management and Circularity	31
	11.5.3 Management of significant waste-related impacts	Environment → Waste Management and Circularity	31
	11.5.4 Waste generated	Environment → Waste Management and Circularity	30
	11.5.5 Waste diverted from disposal	Environment → Waste Management and Circularity	31
	11.5.6 Waste directed to disposal	Environment → Waste Management and Circularity	31
GRI 11.6: Water and effluents	11.6.1 Management of material topics	Environment → Water Management, Materiality Assessment	20, 27

GRI STANDARD	DISCLOSURE	SECTION IN THE REPORT	PAGE NO.
GRI 11.6: Water and effluents	11.6.2 Interactions with water as a shared resource	Environment → Water Management	27
	11.6.3 Management of water discharge-related impacts	Environment → Water Management	29
	11.6.4 Water withdrawal	Environment → Water Management	27
	11.6.5 Water discharge	Environment → Water Management	27
	11.6.6 Water consumption	Environment → Water Management	27, 28
GRI 11.7: Closure and rehabilitation	11.7.1 Management of material topics	Materiality Assessment	20
	11.7.2 Minimum notice periods regarding operational changes	Social → Employees and workplace culture	39
	11.7.3 Programs for upgrading employee skills and transition assistance programs	Social → Employees and workplace culture	43
GRI 11.8: Asset integrity and critical incident management	11.8.1 Management of material topics	Environment → Waste Management and Circularity, Materiality Assessment	20, 30
	11.8.2 Significant spills	Environment → Waste Management and Circularity	30
GRI 11.9: Occupational health and safety	11.9.1 Management of material topics	Social → Occupational Health and Safety, Materiality Assessment	20, 45
	11.9.2 Occupational health and safety management system	Social → Occupational Health and Safety	45
	11.9.3 Hazard identification, risk assessment and incident investigation	Social → Occupational Health and Safety	45, 46
	11.9.4 Occupational health services	Social → Occupational Health and Safety	46

GRI STANDARD	DISCLOSURE	SECTION IN THE REPORT	PAGE NO.
GRI 11.9: Occupational health and safety	11.9.5 Worker participation, consultation and communication on occupational health and safety	Social → Occupational Health and Safety	46, 47
	11.9.6 Worker training on occupational health and safety	Social → Occupational Health and Safety	47
	11.9.7 Promotion of worker health	Social → Occupational Health and Safety	46
	11.9.8 Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	Social → Occupational Health and Safety	45, 46
	11.9.9 Workers covered by an occupational health and safety management system	Social → Occupational Health and Safety	46
	11.9.10 Work-related injuries	Social → Occupational Health and Safety	47
	11.9.11 Work-related ill health	Social → Occupational Health and Safety	47
GRI 11.10: Employment practices	11.10.1 Management of material topics	Materiality Assessment	20
	11.10.2 New employee hires and employee turnover	Social → Employees and workplace culture	41
	11.10.3 Benefits provided to full-time employees that are not provided to temporary or part-time employees	Social → Employees and workplace culture	42
	11.10.4 Parental leave	Social → Employees and workplace culture	40
	11.10.5 Minimum notice periods regarding operational changes	Social → Employees and workplace culture	39
	11.10.6 Average hours of training per year per employee	Social → Employees and workplace culture	43

GRI STANDARD	DISCLOSURE	SECTION IN THE REPORT	PAGE NO.
GRI 11.10: Employment practices	11.10.7 Programs for upgrading employee skills and transition assistance programs	Social → Employees and workplace culture	43
	11.10.8 New suppliers that were screened using social criteria	Social → Responsible Value Chain	54
	11.10.9 Negative social impacts in the supply chain and actions taken	Social → Responsible Value Chain	54
GRI 11.11: Non-discrimination and equal opportunity	11.11.1 Management of material topics	Social → Employees and workplace culture, Diversity, Equity and Inclusivity, Human Rights, Materiality Assessment	20, 39, 48
	11.11.3 Parental leave	Social → Employees and workplace culture	40
	11.11.4 Average hours of training per year per employee	Social → Employees and workplace culture	43
	11.11.5 Diversity of governance bodies and employees	Social → Diversity, Equity and Inclusivity	48
	11.11.6 Ratio of basic salary and remuneration	Social → Diversity, Equity and Inclusivity	49
	11.11.7 Incidents of discrimination and corrective actions taken	Social → Human Rights	44
GRI 11.12: Forced labor and modern slavery	11.12.1 Management of material topics	Materiality Assessment	20
	11.12.2 Operations and suppliers at significant risk for incidents of forced or compulsory labor	Social → Human Rights	44
	11.12.3 New suppliers that were screened using social criteria	Social → Responsible Value Chain	54

GRI STANDARD	DISCLOSURE	SECTION IN THE REPORT	PAGE NO.
GRI 11.13: Freedom of association and collective bargaining	11.13.1 Management of material topics	Materiality Assessment	20
	11.13.2 Operations and suppliers in which the right to freedom of association and collective bargaining may be at risk	Social → Human Rights	44
GRI 11.14: Economic impacts	11.14.1 Management of material topics	Social → Responsible Value Chain, Materiality Assessment	20, 53
	11.14.2 Direct economic value generated and distributed		
	11.14.4 Infrastructure investments and services supported	Social → Community Development	50 - 52
	11.14.6 Proportion of spending on local suppliers	Social → Responsible Value Chain	54
GRI 11.15: Local communities	11.15.1 Management of material topics	Materiality Assessment	20
	11.15.2 Operations with local community engagement, impact assessments and development programs	Social → Community Development	51
	11.15.3 Operations with significant actual and potential negative impacts on local communities	Social → Community Development	51
GRI 11.16: Land and resource rights	11.16.1 Management of material topics	Social → Community Development, Materiality Assessment	20, 50
	11.16.2 List the locations of operations that caused or contributed to involuntary resettlement or where such resettlement is ongoing	Social → Community Development	51

GRI STANDARD	DISCLOSURE	SECTION IN THE REPORT	PAGE NO.
GRI 11.17: Rights of indigenous peoples	11.17.1 Management of material topics	Materiality Assessment	20
	11.17.2 Incidents of violations involving rights of indigenous peoples	Social → Human Rights	44
GRI 11.18: Conflict and security	11.18.1 Management of material topics	Materiality Assessment	20
	11.18.2 Security personnel trained in human rights policies or procedures	Social → Employees and workplace culture	43
GRI 11.19: Anti-competitive behavior	11.19.1 Management of material topics	Materiality Assessment	20
	11.19.2 Legal actions for anti-competitive behavior, anti-trust and monopoly practices	Social → Employees and workplace culture	39
GRI 11.20: Anti-corruption	11.20.1 Management of material topics	Materiality Assessment	20
	11.20.2 Operations assessed for risks related to corruption	Social → Employees and workplace culture, Governance → Policy Frameworks	39, 66
	11.20.3 Communication and training about anti-corruption policies and procedures	Social → Employees and workplace culture, Training and Development	39, 43
	11.20.4 Confirmed incidents of corruption and actions taken	Social → Employees and workplace culture	39
GRI 11.21: Payments to governments	11.21.2 Direct economic value generated and distributed		
GRI 11.22: Public policy	11.22.1 Management of material topics	Materiality Assessment	20

Linkage to UNGC Framework

UNGC Principles	Description	Covered in Section
Principle 1	Businesses should support and respect the protection of internationally proclaimed human rights	- Materiality assessment - Social → Human Rights
Principle 2	Make sure that they are not complicit in human rights abuses	- Materiality assessment - Social → Human Rights
Principle 3	Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining	- Materiality assessment - Social → Human Rights
Principle 4	The elimination of all forms of forced and compulsory labour	- Materiality assessment - Social → Human Rights
Principle 5	The effective abolition of child labour	- Materiality assessment - Social → Human Rights
Principle 6	The elimination of discrimination in respect of employment and occupation	- Materiality assessment - Social → Our Employees
Principle 7	Businesses should support a precautionary approach to environmental challenges	- Materiality assessment - Environmental Stewardship
Principle 8	Undertake initiatives to promote greater environmental responsibility	Environmental Stewardship
Principle 9	Encourage the development and diffusion of environmentally friendly technologies	Environmental Stewardship
Principle 10	Businesses should work against corruption in all its forms, including extortion and bribery	Social → Employees and Workplace Culture

Linkage to SASB Standards

Topic	Code	Accounting	Metric Report Section	Page No.
Greenhouse gas Emission	EM-MD-110a.1	Gross global Scope 1 emissions, percentage methane, percentage covered under emissions-limiting regulations	Emission Management	25
	EM-MD-110a.2	Discussion of long-term and short term strategy or plan to manage Scope 1 emissions, emissions reduction targets and an analysis of performance against those targets	Emission Management	25, 26
Air Quality	EM-MD-120a.1	Air emissions of the following pollutants: (1) NOx (excluding N2O), (2) SOx, (3) volatile organic compounds (VOCs) and (4) particulate matter (PM10)	Emission Management	26
Ecological Impacts	EM-MD-160a.1	Description of environmental management policies and practices for active operations	Biodiversity and Land Use, Policy Framework and Governance Practices	32
	EM-MD-160a.2	Percentage of land owned, leased and/ or operated within areas of protected conservation status or endangered species habitat	Biodiversity and Land Use	32
Operational Safety, Emergency Preparedness & Response	EM-MD-540a.4	Discussion of management systems used to integrate a culture of safety and emergency preparedness throughout the value chain and throughout project lifecycles	Occupational Health and Safety	46

Topic	Code	Accounting	Metric Report Section	Page No.
Water Management	EM-MD-140a.1	(1) Total water withdrawn, (2) total water consumed, percentage of each in regions with High or Extremely High Baseline Water Stress	Water Management	27, 28
	EM-MD-140a.2	Number of incidents of noncompliance associated with water quality permits, standards and regulations	Water Management	28
Hazardous materials management	EM-RM-150a.1	Amount of hazardous waste generated; percentage recycled	Waste Management and Circularity	30
Workforce Health & Safety	EM-RM-320a.1	(1) Total recordable incident rate (TRIR), (2) fatality rate and (3) near miss frequency rate (NMFR) for (a) full-time employees and (b) contract employees	Occupational Health and Safety	47
	EM-RM-320a.2	Discussion of management systems used to integrate a culture of safety	Occupational Health and Safety	46, 47
Management of the Legal & Regulatory Environment	EM-RM-530a.1	Discussion of corporate positions related to government regulations and/or policy proposals that address environmental and social factors affecting the industry
